Hurricane Surge Zone Evacuation Plan Requirements

If the property is located within a Hurricane Surge Zone a submitted evacuation plan must be submitted documenting the agreement or evidence that the owner or manager has the ability to:

1. Distribute timely notices to evacuate the area if an evacuation order has been issued to all residents and commercial lease owners.
2. Annually distribute information to residents of the location of local shelters.
3. Provide all residents with Special Needs the information available to register for the Special Needs Shelter.
4. Distribute annual public emergency preparedness information including information about emergency evacuation routes.
5. Provide direction to residents and tenants to secure outside equipment and furniture, if any, in the case of high winds.
6. Relocate emergency supplies where they can be controlled.
7. Prepare rooms, outside areas, windows and guest facilities to minimize possible injury and/or damage.

Management Companies or Owners can contact the Emergency Management Division each year for publications including the Road to Readiness guide for updated annual information.
